FEBRUARY NEWSLETTER 2012

GREEN'S & RUMENCO EVENING MEETING ALLERTON COURT HOTEL, NORTHALLERTON

We had a very successful evening meeting with over 50 farmers attending. Dr John Vi-Pond (SAC) and David Thornton (Rumenco) gave an informative and lively presentation about the future of UK sheep production and also the need to evaluate your feeding regime to prevent twin lamb disease. Thank you to all who attended and we hope you found it useful.

REMEMBER..... OUR NORTHALLERTON SHOP IS NOW OPEN 9AM-1PM ON SATURDAY'S

SAVE UP TO £10 ON HEPTAVAC P+!

Heptavac-P plus is used for the active immunisation of sheep as an aid in the control of lamb dysentery, pulpy kidney, tetanus, braxy, blackleg, black disease, clostridial metritis and pasteurella. Ewes should be vaccinated against these clostridial and pasteurella infections 4-6 weeks before lambing. This will protect the ewe, but more importantly, the lamb(s) as they receive natural passive immunity from the ewe's colostrum.

Get £10 off a 500ml Heptavac P+
(enough for 250 ewes)
when you buy a 5lt of VitAmax Sheep
or
get £5 off a 500ml Heptavac P+
(enough for 250 ewes)
when you buy a 2.5lt of VitAmax Sheep

Our VitAmax Sheep is a complementary liquid feedstuff containing chelated trace elements and vitamins and is especially beneficial to ewes pre-lambing. It will provide the ewe with all the necessary minerals, trace elements and vitamins needed at this stressful time. Ideally it should be administered 4 weeks before lambing so why not use it at the same time as the Heptavac P+ booster?

Tel. Thirsk 01845 522611 or Northallerton 01609 779548

And finally.... Jim asked his friend, Tony, whether he had bought his wife anything for Valentine's Day.' Yes,' came the answer from Tony who was a bit of a chauvinist, 'I've bought her a belt and a bag.' 'That was very kind of you,' Jim added, 'I hope she appreciated the thought.' Tony smiled as he replied, 'So do I, and hopefully the vacuum cleaner will work better now.'
